for Colby Offers~ but Don't Wait for Them!

From time to time we advertise some very special offers in distinctive, quality furniture, and it is always well worth your while to watch for such exceptional opportunities.

However, we earnestly advise you, when you are in the market for furniture, not to wait for such occasional offers, but to come in at once.

More than three-fourths of our furniture is never advertised. We have seven big floors, filled with beautiful pieces, of all kinds, at all prices, and our stock is constantly changing and being added to. It may well be that, somewhere on display in our show rooms, is exactly the piece of furniture that you are seeking, at a price much lower than you expected to pay. If you wait for that particular article to be advertised, you may wait forever!

So, once more we say — watch for our special offers, but don't wait for them! Whenever you are seeking a piece of furniture, come in — or even if you have no immediate purchase in mind, come in, anyway. You are always welcome to look through our show rooms, whether you buy or not.

Know Nothing of Will.

It was learned today that nothing a been done by friends here to ascertin whether Valentino left a will, or to the extent of his estate. It has seen assumed from the time of the tor's death that if he left a will it would be found in Hollywood.

Friends are of the opinion that Valentino did not leave a large estate and twas known that he had large debts. His screen earnings, however, continue after his death. The daily income, it was said, has been so great that the share that will go to the Valentino estato was estimated between \$15,000 and \$25,000 daily.

You will note that the pages of the "A & P news" are perforated for tearing and marked for punching so that they can be slipped into a note book with other pages to form a com-pact little cook book. You have the assurance that your book will alwys be up-to-date. Menus and recipes are printed at close intervals, always giving the latest in methods of preparing

tasteful dinners. Mrs. E. H. D., of Hammond, Indiana, writes in saying that she finds her file of recipes indispensable. We quote a part of her letter to Ann Page: "The sheets I receive, giving menus and recipes are certainly a great help. Only yesterday, when puzzled as to what to serve, I referred to my file and found a delightful suggrestion that found a delightful suggestion that more than pleased the family." Similar comments to the one penned by Mrs. E. H. D. are received almost daily.

1. Yes.

2. If the relationship was entered into in Illinois it would be invalid here, since common law marriages are not recognized here. Other states which recognize common law marriages in general might refuse to recognize this one, since it would be presumed that a relationship which was illicit in its inception continued to be illicit.

A SMART STORE FOR SMART WOMEN

273rd Blue Ribbon Wednesday The two outstanding features of this store are:

First, that it is the most unusual food shop in the United States; so unusual that people from New York and other large cities wonder why we do not establish like institutions in other cities, where the character and quality and unusual assortments of food sold by this store could not fail to create a tremendous

The second feature is the consistently low price at which this food is sold. The fact is that we sell the best quality of food for less money than most stores ask for inferior grades this has been proved hundreds of times.

Buy your food intelligently make proper comparisons and you will realize the value of this store to the community.

VOU know how much more restful a bedroom is when the furniture in it looks attractive. You probably have such bedrooms now; but you've seen those that didn't look particularly inviting.

The nice thing about such furniture as we show above is that it looks very beautiful and doesn't cost very much. A bedroom equipped with such pieces as these will seem to any one who enters, a place of restful charms.

These pieces are "Scholle-quality" through-out; very substantially made of walnut, with burl overlays. You'll get a much better impression of its beauty by seeing the pieces themselves. While you're here, we'll show you other lovely things; we have a great wealth of fine furniture here.

It will not be long now before you will be settling down for the winter. Better get your equipment ready while our sale is going on; we'll keep the things for you until you are ready to have them delivered. Sale prices are very low.

Many Pick Summerall as Next Staff Chief.

(Pictures on back page.)
[Chicago Tribune Press Service.]
Washington, D. C., Aug. 31.—[Spendal].—Belief that the selection in December of a new chief of staff to succeed Maj. Gen. John L. Hines will mark the end of the influence of the "Pershing crowd" in the war department, was expressed today by army officers in close touch with army politics.

These officers base their opinion on the likelihood that Secretary of War Davis will recommend the appoint-ment of Maj. Gen. Charles Pelot Sum-merall, ranking major general, to President Coolidge rather than another officer more closely identified with the Perships group. ing group.

Summerall was Ignored.

Immediately after he was assigned to duty as chief of staff, following the war, Gen. Pershing began selecting veterans of the American expeditionary forces in the key positions on the

while Gen. Summerall had a brilliant career in France, Gen. Pershing passed him over in selecting his successor and recommended the appointment of Maj. Gen. Hines, another of his corps commanders in France.

This action caused much comment, especially amons friends of Gen. Summers of G

especially among friends of Gen. Sum-merall, who believed that his record in the war and the fact that he outranked Gen. Hines in seniority should have been recognized by Gen. Pershing.

Group Dominated Staff.

As a result of the selections made
by Gen. Pershing, army policy for the next few years was pretty well domi-nated by the Pershing group. In re-cent months, however, this group has been somewhat thinned out by the army rule which limits the time an officer may serve on the general staff before he goes back to service with

At the present time Gen. Hines, who will soon be shifted to other duties, and Maj. Gen. Fox Conner, deputy chief of staff and one of the youngest and most talented officers on the list of major generals, are the highest ranking members of the group still in

Gen. Conner, because of his marked success as deputy chief, has been prominently mentioned to succeed Gen. Hines, but because he is so much younger than the other candidates, his choice is not considered likely.

Ely Is Favored.

In case Gen. Summerall is again passed over, the most likely choice of the President would then be Maj. Gen. Hanson E. Ely, commandant of the war college, who has been highly praised by Gen. Pershing and who is

is Ready for you-after 34 years development

ONTRARY to the usual custom of waiting for promises of development to materialize, the man who wishes a small country estate may step into a place that has been brought to the highest state of refinement after 34 years of tireless effort.

Situated on beautiful Green Lake, Wisconsin, and developed by a man whose sole object was to produce the most beautiful estate in America, Lawsonia is ready for you to enjoy NOW.

Quaint stone walls, satiny lawns, miles of flower beds, and majestic trees in their mute way tell the visitor that this was the work of a man to whom money was no object. With the resources to purchase any similar tract of land in the entire country, the late Victor F. Lawson selected this 1080 acres overlooking beautiful Green Lake, a body of pure clear water 7 miles long and 2 miles wide with scenic vistas that rival even the picturesque Hudson.

For almost a generation, the charms of this private estate have been enjoyed only by the family and chosen guests of one man. Many people do not even know that such an enchanting beauty spot exists.

Important Announcement

LONG DISTANCE TELEPHONE SERVICE CHANGES

(*Applying only to messages to points outside the State of Illinois.)

Effective October 1, 1926

Reductions in Long Distance Rates

To points 150 miles or more distant the rates will be substantially reduced. The greater the distance, the greater the reduction. For example, from Chicago to Detroit the basic station-to-station rate will be \$1.35 instead of \$1.60; to St. Louis, \$1.45 instead of \$1.70; to Pittsburgh, \$2.10 instead of \$2.70; to New York, \$3.40 instead of \$4.65; to San Francisco, \$8.25 instead of \$11.90. A few rates for distances between 24 and 110 miles will be adjusted to make the schedule consistent throughout, but in these cases the increase of the basic station-to-station rate will be only five cents.

Reversed Charges on Station-to-Station Calls

Heretofore the reversal of charges has been available only on person-to-person calls. As a further convenience to the public this privilege will be extended to station-to-station calls where the rate is 25 cents or more.

Longer Reduced Rate Period on Station-to-Station Calls.

Reduced rate hours for station-to-station calls will begin at 7 P. M. instead of 8:30 P. M., as formerly. Between 7 and 8:30 P. M. the discount will be approximately 25 per cent, of the day station-to-station rates: from 8:30 P. M. to 4:30 A. M. the discount will be about 50 per cent of the day rates. These discounts will apply where the day station-to-station rate is 40 cents or more, with a minimum reduced rate of 35 cents. Because of the unsatisfactory service conditions which it brought about, the existing midnight discount will be discontinued.

The net result of these rate changes will be a saving to the telephone users of the United States of approximately \$3,000,000 a year. The service changes are made in the interests of public convenience, to relieve the burden now imposed by the congestion of business at midnight and to furnish still better long distance service.

> * Application has been filed by the Company with the Illinois Commerce Commission to make the same changes in rates between Illinois points. Notice will be given to the Company's subscribers when and if such rates become effective.

WHAT OF HIS FUTURE?

HERE will your boy be twenty years from now? Will be be health. and prosperous, contributing some useful work to the world and enjoying the reward of his honest effort? Will he be getting on toward financial independence . . . perhaps fame? Or will he be unable to meet the sharp competition for a living, regretting his lack of early training and education?

The economic and industrial world gets a little more complex, a little more difficult for the beginner, each year. In the pioneer days, if a man could hunt, fish, follow a trail in the woods and build a log cabin he had sufficient knowledge to sustain himself and his family. But today a man must know many more things in order to accomplish the same end.

Education of the young is now considered a duty to society as well as a grave personal responsibility of parents to children. It is not enough to give them life-you must also show them how to sustain life successfully.

Lenrooters Attack and the Blaine Defends Record.

Wausau, Wm., Aug. 31.—(Special.)
—High taxes are a prime issue, especially among the farmers and merchants, in Wisconsin's primary campaign. The Learnotters are shouting that Gov. Blaine's administration, in his first term, 1921-1922, cost \$23,800 every day more than was spent in the last term of Gov. Phillip, 1919-1920.

The Blaine-Ekern-La Follette campretorts with wild yells that taxes in Wisconsin are actually being reduced. By way of answer to this, the antistatehouse orators are telling the farmers, "Look up your old tax receipts."

The manufacturers are saying high taxes are driving factories out of the state and keeping new enterprises from coming in, while retired persons of wealth are moving to other states like Florida to escape inheritance taxes. At the last session of the legislature a list was submitted of fifty citizens who now hang their hais up in spots obtiside Wisconsin where their money was made, and their wealth was placed at \$150,000,000.

Income Tax Widely Discussed.

On both sides its "Lay on MacDuff" all over the place and taxation is getting emphasis as Wisconsin's most wexatious problem.

The state income tax is perhaps more discussed than any other single feature. The personal property and and complaints are loud against the new system in the cities and hamlets. Under the old scheme the citizen paid his personal property tax and then deducted this from his income tax, but now he pays both, which does not set so well.

Adopt Florida Tactics.

Adopt Florida Tactics.

The offset reduced the total income tax, and by knocking off the offset some \$4,000,000 is added to the tax bill in the state. This has given opportunity for an episode in high financing, that sounds as captivating as anything in Florida last year.

The state itself used to get a cut of 10 per cent of the income tax, to defray cost of collecting, largely. The municipality used to get 70 per cent and the county 20 per cent. The split has now been changed so the state gets 40 per cent, the county 10 per cent and the locality 50 per cent.

The abolition of the personal property asset raised the total income tax from, roughly, eight million to twelve million dollars.

The state used to get ten per cent

million dollars.

The state used to set ten per cent of eight million, or \$800,000. Now the state government gets 40 per cent on twelve million, or \$4,000,000. The state tax on general property used to yield about \$6,506,20. The government took \$1,700,000 out of the treasury surplus to make up the difference in these amounts, and announced that the state would not collect any tax on general property. This has been widely exploited as meaning a tremendous reduction has been made in taxes.

Shifted to General Taxes.

The catch however, is being sifted out from the platforms. All that has been done is to take the pocketbook out of the right pants pocket and put

of the right pants pocket and put the left pocket. xing bodies, like the counties, se receipts from income tax have reduced, have to raise the money

30/50% Oil Saving With this/Yew Oil-Burning Boiler

Everyone knows that the barrier to the far wider use of oil heat for homes is the greater fuel cost normally involved.

But now, with the Bryan Oil-Burning Boiler, you can enjoy the comfort, convenience, and cleanliness of oil heat, at a saving of 30 to 50 per cent in oil-cost, and actually below the cost of coal heat.

For the Bryan Oil-Burning Boiler is scientifically designed and built especially for oil, on principles radically different and far superior to the coal-burning boilers which are actually a handicap to oil as a fuel.

The Bryan Oil-Burning Boiler

The Bryan Oil-Burning Boiler operates efficiently and economcally with any good oil burner, in steam, hot water, vapor or vacuum heating systems. Attractive in appearance, with moss green finish and nickeled pure copper corner strips.

Oil-Burning Boiler

BRYAN

The remarkable economy of the Bryan Oil-Burning Boiler is the result of its specialized design and construction which conform perfectly to the special requirements

In the first place, there is built into the Bryan Oil-Burning Boiler a scientifically correct combustion chamber for the proper combustion of the oil. This, by the way, is an exclusive Bryan feature.

The boiler itself is a nest of durable copper tubes ingeniously arranged in the direct path of natural heat travel-on the principle of the familiar hot water heater. By using copper tubes, closely inter-twined, instead of heavy cast iron walls as in the ordinary coal boiler, the effective heating surface is greatly enlarged, the circulation of water is tremendously accelerated, and the water is heated, or converted into steam, in one-fifth the time required in an ordinary boiler.

Hot water for household use costs 50 per cent less with the Bryan Oil-Burning Boiler. A special hot water coil does away with the costly separate water heater and provides abundant hot water all the year round. °

The Bryan Oil-Burning Boiler with its remarkable efficiency costs no more than the ordinary boiler. It actually pays for itself in fuel saved.

The Bryan Oil-Burning Boiler may be purchased out of income -25% down, balance in 12 months.

The harbored wish that last evening's radio offerings might enable this column to reopen in a blaze of enthusiasm after its period of vacation silence was doomed to disappointment. After these two weeks away from the dials the writer feels conscious of a hesitation to pass judgment upon anything heard last evening. Put—

After sweeping the dials back and forth renewing acquaintances during the 7 to 8 hour interest centered on our comparatively new station, WCFL. The Florentine instrumental trio were playing chamber music selections in concert hall excellence. Vella Cook, mezzo-soprano, well known to the radio andience, whose voice seems to enrich the mind and heart every moment she is on the air. Further, the station tone seems greatly improved since our last hearing.

On the 8 to 9 hour nothing was found comparable to the Chamber Symphony orchestra program from New York through W-G-N. There is never anything particularly spectacu-lar about this regular Tuesday eve-ning offering, but their selections are always choice and attractively pre-sented, which makes for real honest-to-goodness musical joy and satisfac-tion.

W-G-N's following offering, Great Moments from Grand Opera, sung by this station's quartet of staff singers, to 10, was of rare merit. The indiso to 10, was of rare merit. The individual soloists are well known concert and operatic singers, and the fine resonance of the individual singers was particularly noticed last night. The orchestra accompaniment is something of note, in addition to its appropriateness for this type of concert.

Railway Taxes Mounting

The railroads are constantly seeking economies that will improve their service, reduce their rates or strengthen their earning power. That they are successful in such efforts is indicated by the fact that not merely one but all three of these important and worthwhile benefits have resulted from the notable railway economies effected in the last few

One item of railway expense has been going up, however, while most other items have been coming down. The taxes levied upon and collected from the railroads constitute one expense over which the railroads exercise no control, and railway taxes are increasing steadily in the face of reductions in nearly every other item of railway expense.

Going back ten years, railway taxes for 1916 amounted to approximately \$430,000 a day. Every year since then they have increased over the preceding year, and for 1926 they will exceed \$1,000,000 a day. In the last five years, a period of great economy in railway management and operation, the daily tax bill of the railroads has increased on the average more than \$47,000 from year to year.

Not only are railway taxes constantly increasing in the aggregate, but it takes a greater portion of total railway revenues to pay them. In 1920 it took 4.4 cents out of each dollar the railroads received to pay their taxes. In 1925 it took 5.9 cents. This year, present indications are, it will take between 6 and 7 cents.

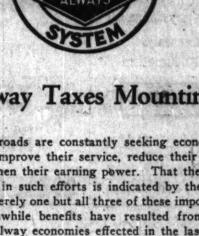

Part of the increase in railway taxes is due, of course, to somewhat increased railway earnings and to improvements which have added to the taxable value of railway property, but the greater part of the increase is the result of new taxes and of increases in state and local tax rates. More than three-fourths of all railway taxes are levied by state and local governments, and the necessity for additional money to meet principal and interest payments on indebtedness contracted by these governments has been a considerable factor in making for greatly increased railway taxes. In the six years 1920 to 1925, inclusive, state and local governments increased their debts approximately six and three-quarter billion dollars. Principal and interest payments on outstanding bonds now consume about 10 per cent of state and about 20 per cent of local government expenditures.

The railroads ask neither favored treatment in tax rates nor exemption from any part of general taxation. They are willing to pay their share of taxes. But, since they practice economy themselves with such good results, they feel it is proper to urge economy in government, which benefits everybody. Most of the taxes that are levied on railway property are also levied on farm lands and build property are also levied on farm lands and buildings, stores, manufacturing plants and other forms of private enterprise. Taxes must come out of the productive activities of the country, and they are shared, indirectly if not directly, by everyone. The public, which pays all taxes in one form or another, is the ultimate beneficiary of all movements for tax reduction.

Constructive criticism and suggestions are in-

Is Strong for the Cab-bonding Law

Do you know that certain taxi-cab interests in this city are operating without any financial responsibility of any kind, and that if they damage you or your property, they can't be held liable for their acts?

Can't you see how careless this makes them?

Are you aware that many so-called cab "companies" have mortgages on their cabs and that these mortgages act in the same way as a mechanic's lien—that in case you have a claim against them, you can't collect a cent?

Don't you know that this lack of financial responsibility makes them careless of your safety, your property and your pocketbook—and that they can do as they please, without any re-

Illinois doesn't contemplate that anyone shall be beyond the law or be allowed to play horse with the public—and that's why it passed the cab-bonding law compelling the execution of a \$2,500.00 bond on every cab in operation.

Are you aware that this law was passed two years ago — and that it has not been in opera-tion because these cabs which want to run wild, are fighting it in the courts — have even carried it to the United States Supreme Court, which is no inexpensive job?

Do you know that Yellow Cab has been ready every minute of the past two years to file these bonds—and has even made them out—but it has been prevented because these cab interests mentioned have been appealing the law from

So far as Yellow Cab is concerned -and it stands alone in this — it has been financially re-sponsible from the hour of its birth — but the law is intended for everybody.

Without FINAN-CIAL RESPONSIBILITY, no system of transportation should be allowed to operate. Ask any bank in Chicago about Yellow Cab's financial responsibility. Then ask them about other cab "companies."

Perhaps it's just retribution for not being a "dry," but The Wake is jinxed by water hazards. On Monday we played Glen View, where you cross the drink seven times on the last nine holes, for the first time in several years. Never mind the score—but we took 17 at the thirteenth hole. No, that's not a misprint—17 not 7. After our first tee shot was hooked out of bounds and our second sliced out of bounds and our second sliced out of bounds and our second sliced out of bounds are got on the fairway. Then we sliced through some bushes into the river when we didn't even know there was a river there. And three times more into the river guarding the green into the road. Turning into the stretch, Jockey Will Garner moved with Rothermel. She fairly flew to the front past the tiring Dark Phantom. She came on to win despite Supremus' desperate challenge by only a head. Had Rothermel been allowed to run at her best clip early in the exciting combat, she might have hung up a world's record.

The track at Lincoln Fields was not lightning fast. Some called it a second slow, drying fast throughout the afternoon. Only five went to the post in the Olympia, but it was a classic field and the race served as a good preliminary for the \$10,000 Lincoln handicap to be run Labor Day. Rothermel's sensational performance and victory makes her one of the leading candidates for the Labor Day event.

Here's What Cubs Must Do to Win This Pennant Race

Although neglected as a pennant possibility in the heated scramble in the National league, McCarthy's Cubs may yet kick up a large fuss before the end is reached. They now are five games behind the leaders and have nothing to worry about and their big chance lies in the fact that the three clubs now up to their ears in the scramble may weaken under the strain. But McCarthy's men must play all except six of their twenty-seven remaining games away from home.

Here in New York the Yankee firm is enjoying a critical situation already and the fact that the team still holds a lead of five and one-half games over the Indians only goes to show that the baseball customer can see a crisis at a great distance. Such a lead at this time means that the Yankees would have great difficulty in losing the pennant if they should play fifty-fifty baseball or thereabouts in their remaining 26 performances.

Viewed from this angle the situation is not as critical as the stockholders of the visiting clubs would desire. The stockholders of teams which are not directly involved in the competition always like their ball games crucial, because the more crucial the ball games the greater their prosperity.

Cot. Jake Ruppert, who owns the Yankses, would prefer his ball games only mildly crucial, if at all, because what would it profit him to incursoftle exaggerated gate receipts just now in the waning period of the season if he should lose the pennant and the business prestige of a champion team next year?

YES, indeed. Prince Albert and pipepleasure go together like "fair and colder," "Romeo and Juliet," "song and dance." Inseparable companions . . . in fair weather and foul. Wherever you see one, you see the other. Prince Albert means jimmy-pipe joy . . . precisely that!

P. A. is cool as picnic lemonade. Cool and consoling when problems press. Sweet and fragrant as wind-blown blossoms. Mild with a mildness that lets you smoke all you want, morning to midnight. Yet with sufficient body to let you know you are smoking. Nicely balanced!

You'll like the taste of this fine old pipe tobacco. More men have liked it than any other brand. This is a matter of record. Quality through and through. Real tobacco for real men. That's Prince Albert. Kind to your tongue and throat. Friendly in spirit and friendly in fact.

If you haven't smoked P. A., you can't possibly know how much deep-down satisfaction that old jimmy-pipe can give you. No matter how set you think you are, buy a tidy red tin of Prince Albert today. Tamp a load into your pipe and take a deep drag. Good? You said it!

Good Faith

EVER since the beginning of commerce and business the Buyer's best guarantee has been the good faith of the Seller. In the complexity of modern business, it is usually impossible for the man who buys personally to judge every element that goes into the quality of the article he is purchasing. He must rely, to a considerable extent, upon the good faith—and the experience and judgment of the man who sells it to him.

The good faith of a house that sells investments to the public is of paramount imortance. The judging of investments is used upon so many complicated factors nat the Buyer must, in most cases, take the word of the Seller for the essential elements that enter into the safety and desirability of

NOW, You Will Heat your Home with Oil

Simple device removes last bar to oil heating your home. Flame starts at top of fire-pot, giving more usable heat at the bottom. Hundreds and hundreds tested in Chicago homes from one to five years. Perfect automatic heat, low cost, extremely quiet,-most owners say "practically noiseless."

Of course, you have thought about heating your home with oil. Every man and woman who has spent even a single winter at the beck and call of a furnace is thinking about it. Every one of them will welcome the wonderful relief of Aladdin Uniform Heat.

Uniform Heat Always

Think what it will mean to you to have your home at the same temperature every hour of the day and night from early fall to late spring, without a bit of work, without any thought, without a moment's attention, without a thing to remember or forget.

Think of the added hours of freedom at home. Week ends free to do what you like. Not a minute's delay getting away in the morning. Whether you're there or not you know the house is cosy and warm. Every room stays at the desired temperature, never varying more than a degree or two.

Women

Think of the cleanliness. No more soot flying about, no more dust and dirt tracked into the house. No more interruptions to work, no more running up and down stairs to shovel coal and change drafts. No more uncertainty about

Everybody

Think of lying in bed as late as you will of a windy, bitterly cold winter morning. Then getting up in complete comfort, to find the house as warm as toast, comfortable everywhere, healthful, invigorating. Join the hundreds who have set themselves free from the drag of furnace cares. Find out how easily and economically and satisfactorily you can have Aladdin Uniform Fuel Oil Heat, Quiet. Settle the oil heat question once and for all in just a few minutes. We have a full line of sizes for all types of round or square boilers and

Get an Oil Heater-Not Just a Burner

There are several good oil burners on the market. No doubt

All burn cheap fuel oil. They are all automatic. All give results satisfactory enough to keep their owners from ever using coal again.

But there is a difference! An important one, too.

There is just so much heat in a gallon of fuel oil. If properly mixed with air and ignited, it will give up that heat. The vital point about an oil burner is what happens to that heat after it is released. The answer to that is the answer to the whole heating question. It makes the difference between an oil BURNER and an oil HEATER.

Two Vital Factors in Heating

Heat that goes up the chimney cannot heat your home. The only source of heat for your rooms is the fire-pot. Every additional second that heat can be held there, in contact with the heating surface, means that much more heat in your home.

There is just so much heating surface in your boiler. Every square inch of that surface should be used to put heat into your home. That's what it's there for.

Aladdin takes advantage of these two facts. It holds the heat longer in the fire-pot. It uses to the limit every square inch of heating surface.

QUIET

The Down Draft Method

Aladdin applies the heat in a totally different way from any other burner. The oil mist is started at the center of the firebox AND FROM NEAR THE TOP. The heat must go DOWN FIRST. This down draft keeps the heat circulating in the bottom. This partly offsets the tendency to rise, thus holding the heat considerably longer in the fire-pot.

A slow traveling flame is projected downward and outward, gently curling in every direction around the very base of the heating surfaces. The heat is applied evenly and uniform-ly all around the lower edges of the fire-pot, taking advantage of the way your furnace is built. Every inch is busily soaking up heat that ordinarily escapes up the chimney.

Tested Under Every Condition for Five Years

This different principle has been tested out for five years in handreds and hundreds of homes. Every conceivable condition of heat plant operation has been met: hot air, hot water, steam, and vapor heating plants; frame, stone, brick, stucco houses and bungalows, old ones, new ones, duplex and apartments. You may talk with any or all of these home owners. You will find not mere satisfaction with a good product, but an enthusiastic response that means unusual performance.

Hear These Simple Facts in Your Home or Office

Find out what you have every right to expect from an oil burner in the way of comfort, cleanliness, convenience and how you may obtain it economically. We will arrange for every home owner to hear a brief, interesting chart talk, mostly pictures. In twenty minutes it will give you a clear understanding of oil heating. There is no mystery, no hokum, no confusion of technical terms to cover up a few simple facts. Just a straightforward common serves talk that talks facts. Just a straightforward, common-sense talk that tells you in plain English the things you want to know about oil heating before you purchase a burner of any kind.

Plan on Real Comfort This Winter

Let's get down to brass tacks on this oil heat question for your home. Begin to enjoy life to the full this winter. Forget about coal, ashes, weather and work. Just be comfortable all the time without work or worry. Make up your mind not to endure another winter without the clean comfort and convenience of Aladdin Uniform Heat.

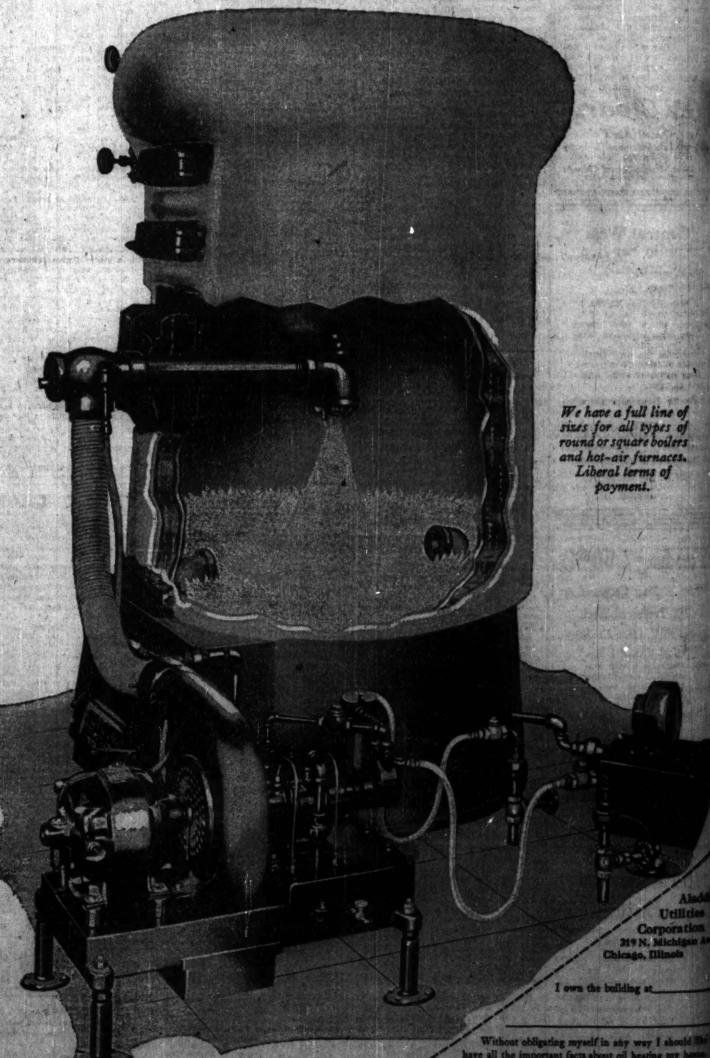

Get It Started Right this Minute

Have someone phone now to Central 3885 or send the coupon and have an Oil-Heating man come out. If you prefer, we will simply send the booklet described in the coupon. Arrange now to get to the bottom of the business and have it all settled before you need heat. You will not be pressed to purchase an Aladdin. The true facts will be pointed out. You may take advantage of them or not just as you see fit, and without any obligation on your part.

Our men cover the entire city and suburbs. Any time or place that suits you suits us. Daytime or evenings in your office or home.

ALADDIN Down-Draft Oil Burner

Engineers agree that no other method of burning oil gives the combined efficiency, economy and extreme quietness of the Aladdin Down Draft System. Note how the flame curls down and out to the very base of the fire-box, using every square inch of heating surface. It uses the furnace as it was designed to be used. No other burner is permitted to use this forward step in oil heating. Learn more about it. The coupon below will bring vital facts about its importance to your comfort and convenience. If you have a building to heat, you can profit by sending your name in now.

The picture opens with the hero, Daniel Hastings, happy and single, being informed that he CAN'T be happy if single, by his friend, Dick Wallace, who has just had a "yes" whispered into his un-shell-like ear by the damsel

"But how find the girl?" bachelor friend. "Who knows—she may be right out-side that door," hisses—it can't be hissed—the accepted lover.
Sure enough, the door opened, the Girl materializes, to almost/im ately disappear again.

From figuratively speaking, Green-land's icy mountain to India's coral attention to their many an avenging conscience. You can imagine Lionel Barrymore in such a rôle and any great expectations you may have regarding his portrayal, you will find fully justified.

He is supported by a most able cast. Some of the players are strangers. Strangers with whom you hope to become better acquainted. "Hold That Lion" is the lightest sort of gay entertainment, presented by a good cast. The picture has been well staged and skilifully directed and is just the thing to see on a warn sum mer's day. It fits in well with the melodious nonsense furnished by Paul Ash et al.

The entire program seemed an enormous hit on Monday morning.

I wonder if all you Aurora winners are as easer to get started as I new idea of education. A large party of college men and a group of girls am. I know what a splendid time we're going to have with our ride though the beautiful country along taking post-graduate courses make up the passenger list. It will be under the auspices of the College of the City of New York.

WASHINGTON SOCIETY

The assistant secretary of war, Col Hanford MacNider, left Washington this evening for Dayton, O., from where he will take an airship for Sar Antonio, Tex., to review the Second division of infantry. Mrs. MacNider will remain in their home in Mason City, Ia., until the middle of next month, when she will join Col. Mac-Nider here on his return.

Miss Edna Wilbur, daughter of the secretary of the navy, will arrive here tomorrow from California, to be the guest for a week of Admirai and Mrs. Eberle. She will then go to New Haven to assume her duties as a mem-ber of the faculty of a girls' school. Striped Sweaters Are Influencing Our Gowns Jumper of the eyening gown has its bands executed in beads, but here the stripes are formed of blue satin matching the tint of the brocade. There is, too, another point of difference. We are apt to retain the summer custom of plaifing the skirts of these evening two piece gowns. Here, however, this method is violated in favor of a newer device. For the same bands of blue functioning on the jumper are retained as the frings of the skirt. A scarf of plain silver lame bordered in the same combination of fabrics is goot the least attractive feature of this stunning model.

Never Touch Any but a true complexion soap to your face Then came this famous beauty ereation. A soap made by experts in beauty solely for ONE purpose: to safeguard the complexion. A soap made of rare cosmetic oils, to be used freely, lavishly on the skim. A soap, thus, that changed the beauty habits of the world.

Leading skin authorities urge it. Most of the pretty skins you see today are largely due to it. Launder, cleanse with any soap you wish. But when beauty is at stake, take care.

cold. If your skin is inclined to be dry, apply a touch of good cold cream—that is all.

Do this regularly, and particularly in the evening. Use powder and rouge, if you wish. But never leave them on over night. They clog the pores, often enlarge them. Blackheads and disfigurements often follow. They must be washed away.

Do not use ordinary soaps in treatment given above. Do not this any green soap, or represented of palm and olive oils, is the sar as Palmolive.

It costs but 10c the cakel—little that millions let it do for the bodies what it does for their fact Obtain a cake today. Then no what an amazing difference of week makes. The Palmolive Corpany (Del. Corp.), Chicago, Illiano (Advertisement)

John Rodgers, naval aviator, killed when his plane crashed at Philadelphia last Friday, was buried in Arlington cemetery this afternoon with full military honors.

Coming from the home of his father. Rear Admiral John A. Rodgers, U. S. N., retired, at Zion Hill, Md., where private funeral services were heid yesterday, the body was escorted to the grave by three companies of marines, two of bluejackets, and the navy band. A formation of five naval planes, piloted by former comrades of the late commander, and another of four marine corps planes, with a blank file to indicate the loss of a fiver, circled overhead throughout the burial service.

parents and high naval officials at the graveside were three members of the crew on the PN-9-1, which Commander Rodgers commanded on the west coast-Hawaiian flight—Lieut. Byron J. Connell, S. R. Pope, aviation pilot, and William M. Bowlin, aviation machinist's mate.

Vocabulary Fails to Yield Epithets That Fit This Type

BY DORIS BLAKE. BY DORIS BLAKE.

"Will you kindly give a shot to girls employed who go out with their employers, knowing they are married?

"My sister's husband takes his stenographer out riding several nights a week and my sister sits at home with her five children. A separation is impossible under her circumstances. She has a baby three months old: All during pregnancy she was left alone night after night.

"While we're giving shots we'll aim the first one at the beast of a husband who tells that young employe of his how he is misunderstood by the woman left at home with their five children. It goes without saying that is

dren. It goes without saying that is his line. A man with five children to support wouldn't have money enough left to attract the gold digger type of person, so he must have won the girl in be case with his plea for sympathy."

In our opinion, punishment bentting men of this debased type has not yet leen invented. Even though the girl were a scheming, designing female and the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally designed to the man weak, he is still equally despicable, and the crime is still his. He is the father of five children and their smallest right is to be able to honor their father. No matter what his feeling for his wife, he owes those children a debt of honor as a respected parent, which he is not paying when he flaunts another woman around the town.

As for the girl involved, even though she may have fallen for the sympathy stuff, we have but to present the picture of a wife at home with a three menths old baby, to convey our contempt for her kind. There isn't one grain of good sportsmanship in her. If she can't get a man of her own, if she has to take one with six impediments, she must be pretty poor white trash. No nice young fellow would want her, that's all. That's what she jets the world know when she takes a magnitude was to take one when she takes a magnitude was the second to be a stake a magnitude was the second to be a stake a magnitude was the second to be a stake a magnitude was the second to be a stake a magnitude was the second to be a stake a magnitude was the second to be a stake a magnitude was the second to be a stake a sta

A FAIR QUESTION. What kind of subdivision property is easier to sell: Property with all improvementssewer, water, gas, electricity, sidewalks, paving, curbs, and trees, etc., or vacant prairie without transportation and miles away from nowhere?

You know the answer. Our Devonshire Manor, with all improvements paid for by us, high class restrictions and splendid transportations, is the easiest selling property in Chicago.

Let us explain the advantage it offers to you as a selling proposition and how it offers you a chance to make big money. No drifters or floaters need apply; only ambitious men, ready to work and follow our instructions.

Busses leaving every day at 11 a. m. and 2:30 p. m. will take you out to see our property. Apply
